

# Gerald Desmond Bridge Replacement Project

Caltrans • Metro • Port of Long Beach • US Department of Transportation

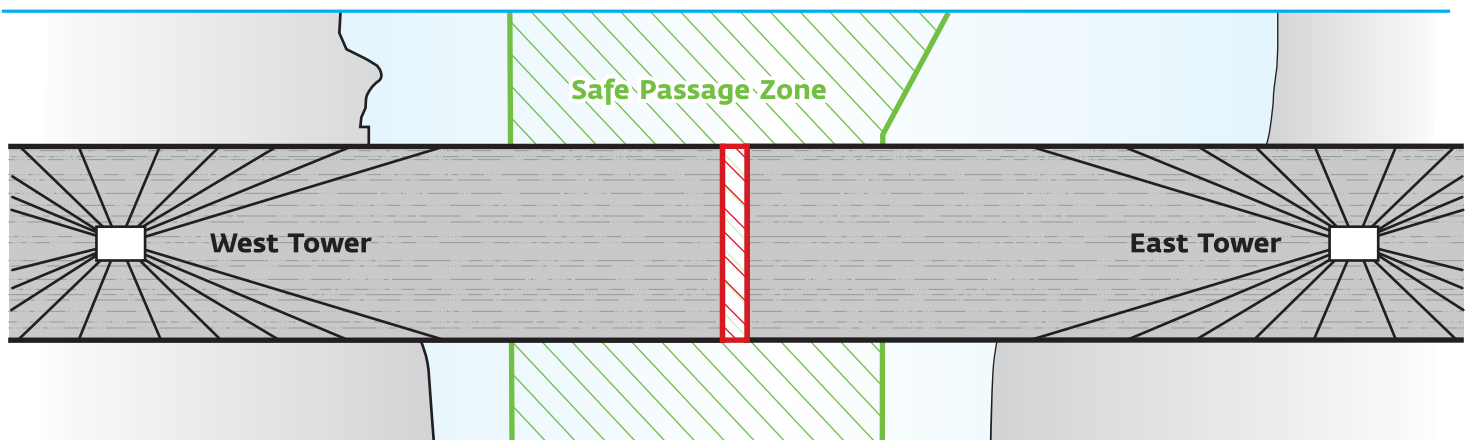

# Fact Sheet

## Back Channel

### Construction Notice for Waterway Traffic

Construction Area

Construction of the Gerald Desmond Bridge Replacement Project's main span has begun over the Back Channel. All recreational and commercial watercraft that travel through the channel between the hours of 6 a.m. and 2:30 a.m. Monday through Saturday are advised to be aware of and identify the stationed spotter boat (pictured) for safe passage under the Bridge Project. Please expect periodic delays through the channel during construction and plan your travel accordingly.

For watercraft approaching the Bridge Project from the north or south, Marine VHF radio channels 13 and 79 can be used to communicate with the spotter boat to determine safe passage. If you have any questions, please contact the Bridge Project Communications Team at 562.485.2780 or [info@GDBRProject.com](mailto:info@GDBRProject.com).

*Spotter boat in place under the construction area for help with safe passage.*
